

## Smart RG 808

### Internet Modem Set Up Guide

# Setting up your High Speed Internet Service

#### Before you begin:

#### > Review contents of your install kit:

- A coax cable to connect to the network
- An ethernet cable to connect your device
- Cable Modem 808 Internet modem and power cord

#### > Read through instructions

You can find additional self-help resources at [distributel.ca/support](http://distributel.ca/support).

### Part 1: Connecting the modem

- 1 Connect one end of the coax cable to the 'Cable' port on your modem, then connect the other end of the cable to a nearby coax wall outlet.

- 2 Attach the Power Cord to the 'Power' port on your modem, plug into a nearby electrical wall outlet, then turn modem on.

- 3 Wait until each of these lights on the front of your modem light up: 'Power', 'DS', 'US', 'Online' as well as '2.4GHz' and '5GHz'.

This can take about 5 minutes.

To connect your devices see instructions on the reverse side of this guide.

## Part 2: Connecting your devices

### Option A: Wired Connection

**For fastest and most reliable speeds.**

Connect one end of the ethernet cable to a 'LAN' Port on your modem and the other end to an ethernet LAN port on the device you want to connect.

### Option B: WiFi Connection

**Connect multiple devices for use throughout your home.**

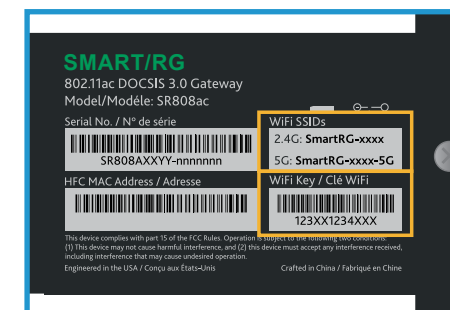

1 Go to WiFi settings on device you want to connect, and search for available WiFi networks.

2 Select the WiFi network (SSID) that matches one on bottom of your modem.

2.4 GHz SSID provides largest coverage.

5 GHz provides faster speeds within a smaller range—may not be available for all devices.

3 If asked for a password, enter the WiFi Key found on bottom of modem.

**You should now be ready to enjoy your Distributel High Speed Internet!**
